

Saurabh Singh Gariya

Full Stack Engineer | React · Node.js · TypeScript · Microservices
+91-7303403220 | sgariya038@gmail.com | linkedin.com/in/sgariya | Gurugram, India

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 4 years of experience designing and shipping scalable web applications with **React**, **TypeScript**, and **Node.js**. Strong across the stack — component-driven front-end architecture, reusable UI component libraries, and event-driven **Node.js/NestJS** microservices (REST, **RabbitMQ**) — with hands-on experience integrating **LLMs** and building AI-agentic tooling. Focused on performance, reusability, and clean, well-tested code delivered in agile teams.

EXPERIENCE

HashedIn Technologies

July 2024 – Present

Software Engineer 2 — Full Stack (React & Node.js)

Gurugram, India

- Delivered a **Next-Gen Point-of-Sale (POS)** platform for a Fortune 50 US retailer deployed across **200+ stores**, building **React** interfaces for store associates and shipping multiple end-to-end user stories that cut average checkout time **~20%**.
- Built a **Node.js** backend-for-frontend consolidating **15+ upstream microservices** into a single façade, reducing client-side complexity; integrated **RabbitMQ** publish/subscribe messaging to improve real-time UI observability with event-driven updates.
- Extracted tightly-coupled UI logic (filters, card, and list views) into a shared base package now reused across **5+ screens**, removing **~1,200 lines** of duplicate code and cutting new-screen build time **~30%**.
- Built **RESTful APIs** on a **NestJS** microservice powering an AI-assist plugin for a Fortune 50 client; co-designed a reusable core library with a senior architect that cut new-LLM-model onboarding from **1 week to 1 day** and standardized authentication and LLM-gateway integration across teams.
- Led a **3-member** front-end team to ship a **chatbot MVP** (conversational UI + reporting view) in **2 months**, owning core components and front-end architecture; cut contract-processing time **~40%** and earned the **Squad of the Quarter** award.
- Built an agentic **Report Builder** (Python, AutoGen) using a selector group-chat to orchestrate agents that return interactive, graphical reports from natural-language queries, backed by **PostgreSQL** and an integrated **MCP** server for schema and data retrieval.
- Engineered high-throughput **real-time services** end-to-end — **Node.js/NestJS** APIs with **WebSocket** streaming and **React** front-ends — backed by **Redis** state with leader election across pods and shipped on **Kubernetes** with GitHub Actions CI/CD.
- Designed a round/event-based processing engine on a shared **TypeScript** core library with settlement and state-consistency guarantees, and led a **microservices** redesign (gateway/engine split) using **Kafka** and an outbox pattern.
- Built full-stack operator dashboards (**React/Vite + NestJS**) with cross-database reporting and role-based access control; added Grafana/Loki observability, ran k6 load tests, and remediated a privilege-escalation issue in a security review.

Amdocs

July 2022 – July 2024

Software Developer — Front-End (React)

Pune, India

- Developed **20+ reusable React.js components** using Redux, **TypeScript**, React Hooks, and Material-UI, reducing duplicate UI development effort across modules.
- Designed and delivered intuitive **CORE-UI components**, streamlining development processes and ensuring timely task completion for the team.
- Authored comprehensive test suites with **Jest** and **React Testing Library**, lifting test coverage to **85%+** and ensuring the delivery of high-quality, bug-free code.
- Debugged **Java Spring** back-end services to reduce dependency on back-end developers and accelerate analysis and implementation.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, SQL

Frontend: React.js, Redux, React Hooks, Material-UI, HTML5, CSS3, Tailwind CSS

Backend: Node.js, NestJS, Express, Spring Boot, REST APIs, Microservices

Data & Messaging: PostgreSQL, Redis, RabbitMQ

Cloud & DevOps: Docker, Kubernetes

AI & Tools: LLM Integration, AI Agents (AutoGen), MCP, Git, JIRA, Postman

EDUCATION

Chandigarh University

2022

Master of Computer Application (MCA) — CGPA: 7.5 / 10

Punjab, India

AWARDS & ACHIEVEMENTS

Awards: Rising Star Spot Award · Top Impactor · Squad of the Quarter | **Coding:** 300+ DSA problems solved (LeetCode peak 1500)
